CHATCO System Test Cases: Updated for the Current System

This document replaces the earlier test cases (09_27_2026). Every case was written from the current code: routes, services, validation rules and on-screen messages. Quoted text is the exact message the system shows.

How it is organised. Part 1 covers the public site and sign-in, which all roles share. Parts 2, 3 and 4 cover the Commuter, Conductor and Admin apps separately. Part 5 covers what one role should see when another role acts (for example, what updates on the admin Monitoring page when a commuter sends an SOS). Only relationships that exist in the code are listed.

Status column. Left blank for the tester. Use P = Passed, F = Failed. Defaults used in expected results (minimum fare PHP 17.00 for the first 4 barangays, PHP 2.25 per barangay after that, 20% discount, free ride every 10 paid rides, 30-minute remittance grace) are the seeded values. If an admin has changed them in Settings, use the saved values instead.

Test accounts. Several cases need two admin accounts, two devices for one conductor, or two commuters. Signing in to the same admin account in a second browser ends the first session by design (TC-AUTH-LOGIN-039), so use separate accounts where a case says so.

Part	Roles	Modules	Cases	Case range
Part 1: Public Site and Sign-in	Public, Commuter, Conductor, Admin	Public Pages, Commuter Sign-up, Sign-in and Sessions, Page Access by Role, Forgot Password, Set New Password (first sign-in)	58	001 to 058
Part 2: Commuter App	Commuter	Live Map and Nearby Units, Pick Me Up (Hail), Fare Guide, GCash Payment by QR, Vouchers When Paying, Cash Receipt Claim and Payment History, Rewards, Emergency SOS, Share My Ride, Lost and Found (Commuter), Ride Feedback, Profile and Account, Discount Application, Student Renewal	94	059 to 152
Part 3: Conductor App	Conductor	Unit Verification and Starting a Shift, Operating Device, Live Location, Capacity and Break, Hail Requests, Recording Fares, Offline Use, Receipts and Transaction History, Emergency SOS, End of Day and Remittance, Metrics, Settings and Fare Updates	57	153 to 209
Part 4: Admin App	Admin	Dashboard and Analytics, User Management: Registrations, User Management: Accounts, Discount Applications and Renewals, Fleet: Vehicles, Fleet: Drivers and Conductors, Receipts and Remittance, Live Monitoring and SOS, Lost and Found (Admin), Announcements, Feedback and Activity Logs, Settings	95	210 to 304
Part 5: Cross-Role Interactions	Commuter, Conductor, Admin (two or more at once)	Accounts and Access, Fleet and Shifts, Hails, Payments, Receipts and Rewards, Remittance, Safety, Lost and Found, Discounts, Feedback and Announcements	58	305 to 362
Total			**362**	

Role Permissions at a Glance

What each role can do, as enforced by the backend role checks and the page guard. A signed-in user who opens another role's page is sent back to their own dashboard; a direct API call to another role's endpoint returns 403 Forbidden.

Area	Commuter	Conductor	Admin
Sign-in and landing	Email or username. Lands on /dashboard. Blocked while Pending, Rejected or Suspended.	Admin-generated username. Lands on /conductor-dashboard, or /unit-verification when no shift is active. Blocked when Disabled.	Email or username. Lands on /admin-dashboard. One session at a time.
Pages	/dashboard, /fare, /rewards, /feedback, /profile, /lost-and-found, /discount-application, /student-renewal, /gcash/return	/unit-verification, /conductor-dashboard (with End of Day, Metrics, Settings)	/admin-dashboard, /users, /vehicles, /remittance, /receipts, /monitoring, /analytics, /lost-found, /announcements, /activity-logs, /settings/*
Live map	Sees on-duty units that are not on break. Can hail within 1 km.	Broadcasts own unit's GPS. Sees hails for own unit.	Sees every on-duty unit, breaks, overspeeding and demand zones.
Payments	Scans GCash QR, claims cash receipts, uses vouchers, sees own payment history.	Records cash, starts GCash QR, applies voucher codes, sees own shift transactions.	Sees all transactions and receipts, declares remitted cash.
Safety	SOS (only near an on-duty unit), Share My Ride, Lost & Found claims.	SOS from anywhere during work, with hotline shown.	Acknowledges and resolves SOS, manages Lost & Found items and claims.
Accounts	Edits own profile, email (verified), password (verified), applies for discounts.	Edits own photo and app settings only.	Approves or rejects sign-ups, edits, suspends, deletes users, creates admins and conductors, reviews discounts.
Configuration	None.	None.	Fare and financial rules, operations rules, vouchers, receipts, notification wording, maintenance mode, FAQs.

Part 1: Public Site and Sign-in

Roles: Public, Commuter, Conductor, Admin

A. Public Pages

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-PUB-PAGE-001	Landing page loads	Not signed in	1. Open the site root (/)	Landing page shows the CHATCO introduction, features, safety tools and the Calumpit-Meycauayan route. Sign in and Sign up open as dialogs.	
TC-PUB-PAGE-002	FAQ chat bubble	At least one active FAQ exists	1. Open the chat bubble 2. Pick a category 3. Pick a question	The question shows as a right-aligned bubble and the answer as a left-aligned bubble. Only active FAQs from Admin > FAQ Management appear.	
TC-PUB-PAGE-003	Terms and Privacy pages	Not signed in	1. Open /terms-of-service 2. Open /privacy-policy	Both pages load without signing in.	
TC-PUB-PAGE-004	Signed-in user opens the landing or login page	Signed in as any role	1. Open / 2. Open /login	Redirected to the role's own dashboard (/dashboard, /conductor-dashboard or /admin-dashboard).	
TC-PUB-PAGE-005	Share link with an unknown token	None	1. Open /share/abc123	"Tracking unavailable" with "This tracking link was not found." No location is shown.	

B. Commuter Sign-up

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-PUB-SIGNUP-006	Required personal fields left blank	Sign-up open on Personal Information	1. Leave all fields blank 2. Continue	Errors under each field: "Enter your first name.", "Enter your surname.", "Enter your birthdate.", "Select your gender.", "Select the commuter type you're applying for." The step does not advance.	
TC-PUB-SIGNUP-007	Birthdate today or in the future	Personal Information step	1. Pick today's date or a future date 2. Continue	"Your birthdate must be in the past."	
TC-PUB-SIGNUP-008	Invalid email format	Contact & Verification step	1. Enter "juan@" 2. Request a code	"That doesn't look like a valid email address." No code is sent.	
TC-PUB-SIGNUP-009	Contact number in the wrong format	Contact & Verification step	1. Enter 9171234567 (10 digits) 2. Continue	"Enter an 11-digit mobile number starting with 09 (e.g. 09171234567)."	
TC-PUB-SIGNUP-010	Contact number already used	Another commuter uses 09171234567	1. Enter 09171234567 2. Continue	"That contact number is already in use."	
TC-PUB-SIGNUP-011	Email already registered	An account uses the email	1. Enter that email 2. Request a code	"That email is already in use." No code is sent.	
TC-PUB-SIGNUP-012	Request a verification code	Valid, unused email	1. Request a code	A 6-digit code is emailed. The code is valid for 15 minutes.	
TC-PUB-SIGNUP-013	Request a code again within 60 seconds	A code was just sent	1. Request another code right away	"You requested a code a moment ago — check your inbox for it." A new code can be requested after 60 seconds.	
TC-PUB-SIGNUP-014	Code incomplete	Code sent	1. Enter only 3 digits 2. Continue	"Enter all 6 digits from the email."	
TC-PUB-SIGNUP-015	Wrong code	Code sent	1. Enter a wrong 6-digit code	"That code is incorrect. You have 4 attempts left before you need a new code." The count goes down with each wrong try.	
TC-PUB-SIGNUP-016	Five wrong codes	Code sent	1. Enter a wrong code 5 times	"Too many incorrect attempts. Please request a new code." The correct code no longer works until a new one is requested.	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-PUB-SIGNUP-017	Expired code	Code older than 15 minutes	1. Enter the old code	"That code is incorrect or has expired. Please request a new one."	
TC-PUB-SIGNUP-018	Email edited after it was verified	Email verified	1. Go back and change the email	"Your email address changed, so it needs verifying again." The new address must be verified.	
TC-PUB-SIGNUP-019	Username with invalid characters	Account Credentials step	1. Enter "juan dela cruz!"	"Usernames can only use letters, numbers, periods (.) and underscores (_), with no spaces." Maximum 16 characters.	
TC-PUB-SIGNUP-020	Username taken	Username "juan_dc" exists	1. Enter juan_dc 2. Submit	"The username has already been taken."	
TC-PUB-SIGNUP-021	Weak password	Account Credentials step	1. Enter "password1"	Rejected. The checklist shows what is missing. Rules: 8 to 128 characters, at least one uppercase letter, one number and one symbol.	
TC-PUB-SIGNUP-022	Passwords do not match	Account Credentials step	1. Enter different values in Password and Confirm	"These passwords don't match." Submit stays blocked.	
TC-PUB-SIGNUP-023	Student, Senior or PWD applicant without an ID	Commuter type Student	1. Skip the ID upload 2. Submit	"A valid ID image is required." The label reads "Upload Student ID / Any School Form *" (Senior and PWD show their own ID labels).	
TC-PUB-SIGNUP-024	Regular applicant and the Force Valid ID Upload setting	Admin > App Configuration	1. Turn Force Valid ID Upload off, sign up as Regular without an ID 2. Turn it on, sign up as Regular without an ID	Off: the field reads "Upload Valid ID (optional)" and sign-up succeeds. On: the ID is required. Student, Senior and PWD always need an ID.	
TC-PUB-SIGNUP-025	Unsupported ID file	Any ID upload step	1. Upload a .gif or .pdf	"That file type isn't supported. Upload a JPG, PNG, or WebP image." Images up to 5 MB are accepted.	
TC-PUB-SIGNUP-026	Camera blocked when taking an ID photo	Browser camera permission denied	1. Choose Take a Picture of Your ID	"Camera permission denied. Allow camera access, or upload an image instead."	
TC-PUB-SIGNUP-027	Submit without agreeing to the terms	All steps filled	1. Open the terms dialog 2. Close it without agreeing	Registration is not submitted. It is only sent with "Agree & submit registration".	
TC-PUB-SIGNUP-028	Successful sign-up	All fields valid, email verified	1. Agree & submit registration	The account is created as Pending. Signing in shows "Your account is pending admin approval." Admins get a "New registration" notice (see Part 5).	
TC-PUB-SIGNUP-029	Sign-up during commuter maintenance	Maintenance mode on for Commuter	1. Try to sign up	"CHATCO is currently undergoing scheduled maintenance. Please try signing up again later."	
TC-PUB-SIGNUP-030	Sign-up after three rejections	Email or contact number rejected 3 times	1. Sign up again with the same email or number	"This registration has been rejected 3 times. For security, new registrations with this email or contact number are temporarily paused until [date] ..." The pause lasts 3 days.	

C. Sign-in and Sessions

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-AUTH-LOGIN-031	Wrong password	Existing account	1. Enter a wrong password 2. Sign in	"The provided credentials are incorrect." The same message shows for an unknown email.	
TC-AUTH-LOGIN-032	Commuter signs in with email or username	Approved commuter	1. Sign in with the email 2. Sign out, then sign in with the username	Both work and open /dashboard.	
TC-AUTH-LOGIN-033	Conductor sign-in	Conductor account, no active shift	1. Sign in with the generated username and password	Opens Unit Verification. With an active shift, the conductor dashboard opens instead.	
TC-AUTH-LOGIN-034	Admin sign-in	Admin account	1. Sign in	Opens /admin-dashboard. Activity Logs records "Signed in".	
TC-AUTH-LOGIN-035	Pending commuter signs in	Registration not yet approved	1. Sign in with correct details	"Your account is pending admin approval."	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-AUTH-LOGIN-036	Rejected applicant signs in	Registration was rejected	1. Sign in with the old details	"The provided credentials are incorrect." A rejected account is removed so the email can register again.	
TC-AUTH-LOGIN-037	Suspended user signs in	Commuter suspended for 7 days	1. Sign in	"This account is suspended until [date and time]. Reason: [reason]". A permanent suspension reads "suspended permanently".	
TC-AUTH-LOGIN-038	Disabled conductor signs in	Conductor disabled by admin	1. Sign in	"This conductor account has been disabled. Ask an administrator to reset your credentials."	
TC-AUTH-LOGIN-039	Admin signs in on a second browser	Admin signed in on Browser A	1. Sign in to the same admin on Browser B 2. Use Browser A	Browser A is sent to /login with a session-ended notice. Activity Logs records "Signed in and ended the session on another device".	
TC-AUTH-LOGIN-040	Commuter on web and mobile at the same time	Commuter signed in on web	1. Sign in on the mobile app 2. Use the web app 3. Sign in on a second web browser	Web and mobile stay signed in together (one session per platform). The second web sign-in ends the first web session.	
TC-AUTH-LOGIN-041	Sign-in during maintenance	Maintenance on for Commuter and Conductor	1. Sign in as commuter 2. Sign in as conductor 3. Sign in as admin	Commuter and conductor see the maintenance message. Admin signs in normally.	
TC-AUTH-LOGIN-042	Many sign-in attempts in a row	None	1. Submit the sign-in form repeatedly with wrong details	After the rate limit, further attempts are refused for a short time (Too Many Requests).	
TC-AUTH-LOGIN-043	Sign out	Signed in	1. Sign out 2. Press Back in the browser	The session ends. Protected pages redirect to /login.	

D. Page Access by Role

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-AUTH-ACCESS-044	Signed-out user opens protected pages	Signed out	1. Open /dashboard 2. Open /conductor-dashboard 3. Open /admin-dashboard	Redirected to /login each time.	
TC-AUTH-ACCESS-045	Commuter opens admin or conductor pages	Signed in as Commuter	1. Open /receipts 2. Open /activity-logs 3. Open /unit-verification	Redirected to /dashboard (the commuter's own home). No admin or conductor data loads. (Changed from the old case 041, which expected /login.)	
TC-AUTH-ACCESS-046	Conductor opens commuter or admin pages	Signed in as Conductor	1. Open /dashboard 2. Open /users	Redirected to /conductor-dashboard.	
TC-AUTH-ACCESS-047	Admin opens commuter or conductor pages	Signed in as Admin	1. Open /dashboard 2. Open /unit-verification	Redirected to /admin-dashboard.	
TC-AUTH-ACCESS-048	Direct API call to another role's endpoint	Signed in as Commuter	1. Call GET /api/admin/users with the commuter token	403 "Forbidden". No data is returned.	
TC-AUTH-ACCESS-049	Session revoked while a page is open	Commuter on /dashboard	1. Admin suspends the commuter 2. Commuter clicks anything that loads data	The commuter is sent to /login with a session-ended notice.	

E. Forgot Password

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-AUTH-FORGOT-050	Unknown email	None	1. Enter an unregistered email 2. Submit	"No account is registered with that email. If your registration is still awaiting admin approval, or was rejected, you cannot reset a password yet."	
TC-AUTH-FORGOT-051	Account still pending	Commuter not yet approved	1. Enter its email 2. Submit	"Your account is still pending admin approval. You can reset your password once it has been approved." No code is sent.	
TC-AUTH-FORGOT-052	Request a reset code	Approved account	1. Enter the email 2. Submit	"We have sent a 6-digit reset code to your email." The code is valid for 15 minutes.	
TC-AUTH-FORGOT-053	Wrong reset code five times	Code sent	1. Enter a wrong code 5 times	"Too many incorrect attempts. Please request a new code."	
TC-AUTH-FORGOT-054	Weak new password	Code verified	1. Enter "abc12345"	Rejected with the password rules (8+ characters, uppercase, number, symbol).	
TC-AUTH-FORGOT-055	Successful reset	Code verified	1. Enter a strong new password twice 2. Submit 3. Sign in with the old password, then the new one	"Password reset successfully. You can now log in." Every device is signed out. The old password fails and the new one works.	

F. Set New Password (first sign-in)

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-AUTH-SETPW-056	First sign-in with a default password	Admin account created by another admin, or a commuter account created on-site by an admin	1. Sign in with the default password 2. Try to open any other page	Redirected to /set-new-password every time. API calls return "You must set a new password before you can continue."	
TC-AUTH-SETPW-057	New password equals the default	On /set-new-password	1. Enter the default password as the new one	"The new password must be different from your default password."	
TC-AUTH-SETPW-058	Set the password	On /set-new-password	1. Enter a strong password twice 2. Save 3. Open /set-new-password again	Taken to the role's dashboard. Opening the page again redirects to the dashboard.	

Part 2: Commuter App

Roles: Commuter

A. Live Map and Nearby Units

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-MAP-059	Only on-duty units appear	One unit on an active shift, one on break, one with no shift	1. Open /dashboard	Only the active, not-on-break unit shows. Units on break or without a shift are hidden.	
TC-COMM-MAP-060	Unit details panel	A unit is on the map	1. Tap the unit	Shows plate, unit number, crew names and capacity status.	
TC-COMM-MAP-061	Capacity status text	Conductor sets Standing, then Full	1. Open the unit panel after each change	Standing: "Standing passengers only. Check with the conductor before boarding." Full: "This unit is full and is not accepting passengers." Available: "Seats available ..."	
TC-COMM-MAP-062	Location permission denied	Browser location blocked	1. Open /dashboard	"Location access denied" hint. Units still show on the map, but distance and ETA do not.	
TC-COMM-MAP-063	Commuter more than 1 km from every unit	Location on, no unit within 1 km	1. Open /dashboard	"Outside service radius" — "Move within 1 km of a conductor unit to see ETA and hail. Vehicle locations are still visible on the map."	
TC-COMM-MAP-064	Unit leaves the map while its panel is open	Unit panel open	1. Conductor goes on break or ends the shift	"This unit has left the live map. It may be on break or has ended its shift."	
TC-COMM-MAP-065	Unit GPS is stale	Conductor's phone stopped sending GPS	1. Open the unit panel	"Waiting for a fresh GPS location from this unit."	

B. Pick Me Up (Hail)

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-HAIL-066	Hail a unit within 1 km	Unit on duty with a fresh GPS fix, commuter within 1 km and near the route	1. Press and hold to hail	Hail is sent and shows as waiting. It expires after 3 minutes if the conductor does not respond.	
TC-COMM-HAIL-067	Second hail while one is pending	A hail is pending	1. Press and hold to hail again	"You already have a pending hail."	
TC-COMM-HAIL-068	Hail a unit that is on break	Unit on break	1. Try to hail it	Refused: "Vehicle is currently on break".	
TC-COMM-HAIL-069	Hail from more than 1 km away	Commuter over 1 km from the unit	1. Try to hail	Refused with an outside-radius result. No hail is created.	
TC-COMM-HAIL-070	Pickup point far from the route line	Within 1 km of the unit but over 1 km from the route	1. Try to hail	"Pickup point is outside the active route coverage."	
TC-COMM-HAIL-071	Hail when the unit's GPS is stale	Unit's last GPS fix over 10 minutes old	1. Try to hail	"Vehicle position is unavailable or stale"	
TC-COMM-HAIL-072	Cancel a pending hail	A hail is pending	1. Cancel the hail	Hail shows as cancelled and disappears from the conductor's map.	
TC-COMM-HAIL-073	Commuter walks out of range	A hail is pending	1. Move more than 1 km from every unit	"Hail stopped — you moved out of range of all nearby units."	
TC-COMM-HAIL-074	Hail expires	A hail is pending	1. Wait 3 minutes without the conductor responding	The hail becomes Expired (within about 1 minute after the 3-minute limit).	

C. Fare Guide

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-FARE-075	Look up a fare	On /fare	1. Pick a pickup stop 2. Pick a drop-off stop	Shows the regular and discounted fare. Example with defaults: up to 4 barangays = PHP 17.00, each extra barangay adds PHP 2.25, discounted = regular less 20%.	
TC-COMM-FARE-076	Barangay count	On /fare	1. Pick stop 1 and stop 6	Counted as 6 barangays (both ends count): 17.00 + 2 x 2.25 = PHP 21.50 regular.	
TC-COMM-FARE-077	Same pickup and drop-off	On /fare	1. Pick the same stop twice	The minimum fare applies.	

D. GCash Payment by QR

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-PAY-078	Scan a valid payment QR	Conductor generated a GCash QR	1. Open Scan Payment QR 2. Scan the conductor's QR	"Amount Due" shows the fare for this commuter's type. Confirm Payment opens GCash.	
TC-COMM-PAY-079	Pay successfully	Scanned and confirmed	1. Approve the payment in GCash	Return page: "Payment successful" — "GCash confirmed your payment. Have a safe trip." The ride appears in payment history.	
TC-COMM-PAY-080	Cancel in GCash	Scanned and confirmed	1. Cancel in GCash	Return page shows "Payment cancelled". Nothing is charged.	
TC-COMM-PAY-081	Slow confirmation	Payment approved, confirmation delayed	1. Wait on the return page	"This is taking longer than usual. You can leave this page; the result will show in your payment history."	
TC-COMM-PAY-082	QR expired	QR older than 2 minutes	1. Scan it	"This payment QR has expired or already been paid. Please ask the conductor to generate a new one."	
TC-COMM-PAY-083	QR already claimed by another commuter	Commuter A scanned the QR	1. Commuter B scans the same QR	"This payment has already been claimed by another commuter. Please ask the conductor to generate a new one."	
TC-COMM-PAY-084	Invalid QR	Any non-CHATCO QR	1. Scan it	"This payment QR is invalid or was not found. Please ask the conductor to generate a new one."	
TC-COMM-PAY-085	Camera blocked	Camera permission denied	1. Open Scan Payment QR	"Camera access blocked" — "Allow camera access in your browser settings, then try again."	
TC-COMM-PAY-086	Discounted commuter scans	Approved Student, Senior or PWD commuter	1. Scan a QR for a regular PHP 21.50 fare	Amount Due shows the discounted fare (PHP 17.20 with the 20% default).	

E. Vouchers When Paying

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-VOUCHER-087	Free-ride voucher covers a solo ride	Commuter has an available free-ride voucher	1. Scan a GCash QR 2. Choose to use the voucher	"Use your free-ride voucher?" then "Your voucher covered this ride in full — nothing left to pay." The voucher moves to Used.	
TC-COMM-VOUCHER-088	Discount voucher on a solo ride	Available PHP 5 discount voucher	1. Scan a GCash QR 2. Use the voucher	The voucher takes up to PHP 5 off. The rest is paid in GCash.	
TC-COMM-VOUCHER-089	Group ride: one voucher per passenger	Group QR for 3 passengers, commuter has 4 vouchers	1. Select 4 vouchers	"You can use at most one voucher per passenger."	
TC-COMM-VOUCHER-090	Group ride: more vouchers than needed	Group QR, vouchers already cover the total	1. Add another voucher	"You selected more vouchers than this ride needs."	
TC-COMM-VOUCHER-091	Voucher already applied	A voucher was applied to this ride	1. Try to apply another	"A voucher has already been applied to this ride."	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-VOUCHER-092	Expired voucher	Voucher past its expiry	1. Try to use it	It is not offered. A direct attempt returns "This voucher has expired."	

F. Cash Receipt Claim and Payment History

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-RECEIPT-093	Claim a printed cash receipt	Conductor recorded a cash fare and printed a receipt	1. Open Scan Receipt 2. Scan the receipt QR	"This cash ride now counts toward your next free ride." The ride appears in payment history.	
TC-COMM-RECEIPT-094	Scan your own receipt again	Receipt already claimed by this commuter	1. Scan it again	"Already Claimed" — "You have already claimed this receipt." Nothing is counted twice.	
TC-COMM-RECEIPT-095	Receipt claimed by someone else	Another commuter claimed it	1. Scan it	"This receipt has already been claimed."	
TC-COMM-RECEIPT-096	Receipt older than 6 hours	Receipt printed over 6 hours ago	1. Scan it	"Receipt Expired". It cannot be claimed.	
TC-COMM-RECEIPT-097	Payment QR scanned as a receipt	A GCash payment QR	1. Scan it in Scan Receipt	Refused: "This QR is not a cash receipt".	
TC-COMM-RECEIPT-098	Payment history filters	Several past payments	1. Filter by Today, This Week, This Month 2. Pick a date range	Only payments in the period show, with matching totals.	

G. Rewards

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-REWARD-099	Earn a free ride	9 paid rides counted	1. Pay for a 10th ride (GCash or a claimed cash receipt)	A free-ride voucher appears in Rewards > Available, valid for 3 days.	
TC-COMM-REWARD-100	Voucher tabs	Vouchers in several states	1. Open Rewards 2. Switch between Available, Used and Expired	Each voucher shows in the right tab with its expiry date.	
TC-COMM-REWARD-101	Unclaimed cash rides do not count	Cash ride with the receipt not scanned	1. Check reward progress	Progress does not change until the receipt is claimed.	

H. Emergency SOS

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-SOS-102	Send SOS near an on-duty unit	Within 100 m of an on-duty unit with a GPS fix under 2 minutes old	1. Open SOS 2. Confirm	"Sending distress signal…" then "Waiting for dispatch to respond". Admins are alerted (see Part 5).	
TC-COMM-SOS-103	Send SOS away from any unit	No on-duty unit within 100 m	1. Open SOS 2. Confirm	"SOS is only available near an on-duty CHATCO jeepney." The emergency hotline shows as a tap-to-call number. No alert is created.	
TC-COMM-SOS-104	Location permission denied	Location blocked	1. Open SOS 2. Confirm	"Please allow location access. We need your GPS coordinates to direct respondents to you."	
TC-COMM-SOS-105	SOS already open	An SOS is Active or Acknowledged	1. Send SOS again	The existing alert is shown. No second alert is created and admins are not paged again.	
TC-COMM-SOS-106	Stop own SOS	SOS active	1. Stop the SOS	The alert closes. Admins get "SOS stopped: [name]".	
TC-COMM-SOS-107	Too many SOS requests	Several SOS sent in a short time	1. Send another	"You've already sent an SOS recently. Please wait before trying again."	

I. Share My Ride

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-SHARE-108	Create a share link	Location on	1. Open Share live location	A link is created. "GPS connected, sharing your live position". "Stops sharing automatically after 30 minutes".	
TC-COMM-SHARE-109	Open share again while a link is active	A link is active	1. Open Share live location again	The same link is returned. No duplicate is created.	
TC-COMM-SHARE-110	Stop sharing	A link is active	1. Stop sharing	"Location sharing stopped". The viewer page no longer shows the location.	
TC-COMM-SHARE-111	Link reaches 30 minutes	A link is active	1. Wait 30 minutes 2. Open the link	The viewer sees "This link has expired".	
TC-COMM-SHARE-112	GPS unavailable	Location off	1. Create a link	The link is created, with a notice that it can't show a live position until GPS works.	

J. Lost and Found (Commuter)

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-LOST-113	Browse found items	Admin logged items	1. Open /lost-and-found 2. Filter by category and by Today, Week, Month, Year	Available and Claimed items show with photos. Filters narrow the list.	
TC-COMM-LOST-114	Watch and unwatch an item	An item is listed	1. Watch it 2. Open My Watchlist 3. Unwatch it	The item appears in and then leaves the watchlist.	
TC-COMM-LOST-115	Claim with proof and photos	Item is Available	1. Claim 2. Enter proof of ownership 3. Attach 2 photos 4. Submit	Claim is Pending. The item shows as Claimed to others. Admins get "New claim".	
TC-COMM-LOST-116	Claim with a 4th photo	Claim form open	1. Attach 4 photos	"You can attach up to 3 photos."	
TC-COMM-LOST-117	Photo too large or wrong type	Claim form open	1. Attach a 6 MB photo 2. Attach a .gif	"Each photo must be 5 MB or smaller." / "Photos must be JPG, PNG, or WEBP."	
TC-COMM-LOST-118	Proof left blank	Claim form open	1. Submit without proof	Validation error. The claim is not saved.	
TC-COMM-LOST-119	Claim an item that is not open	Item is Released, Closed or Expired	1. Try to claim	"This item is RELEASED and cannot be claimed" (with the item's status).	
TC-COMM-LOST-120	Claim again after 3 rejections	3 claims on this item rejected	1. Submit a 4th claim	"You have reached the maximum number of rejected claims for this item"	
TC-COMM-LOST-121	Cancel a pending claim	Claim Pending	1. Open My Claims 2. Cancel the claim	Claim is cancelled.	
TC-COMM-LOST-122	Cancel an approved claim	Claim Approved	1. Try to cancel	"Only PENDING claims can be cancelled (current: APPROVED)"	

K. Ride Feedback

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-FEEDBACK-123	Rate a ride from the unit QR	Unit has a shift today	1. Open Feedback 2. Scan the unit QR 3. Rate driver and conductor 1-5 4. Add a comment 5. Submit	Feedback is saved for that shift. A payment is not needed.	
TC-COMM-FEEDBACK-124	Second feedback for the same shift	Already rated this shift	1. Submit again	"You have already submitted feedback for this shift"	
TC-COMM-FEEDBACK-125	Unit with no shift today	Unit has no shift today	1. Scan its QR	"No active crew for this unit today"	
TC-COMM-FEEDBACK-126	Rating missing	Feedback form open	1. Submit without the conductor rating	"Conductor rating is required"	

L. Profile and Account

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-PROFILE-127	Edit contact number	Profile open	1. Enter 0917123456 (10 digits) 2. Save 3. Enter a number another commuter uses 4. Save	"Enter an 11-digit mobile number starting with 09 ..." then "That contact number is already in use."	
TC-COMM-PROFILE-128	Upload a profile photo	Profile open	1. Pick a photo 2. Crop 3. Save	Photo updates. JPG, PNG, WebP up to 3 MB and 4096 x 4096 px. Larger files are refused.	
TC-COMM-PROFILE-129	Switch theme	Profile open	1. Switch between light and dark	The app theme changes and stays after reload.	
TC-COMM-PROFILE-130	Change password: wrong current password	Change Password open	1. Enter a wrong current password 2. Request the code	"The provided current password is incorrect."	
TC-COMM-PROFILE-131	Change password: same as current	Change Password open	1. Enter the current password as the new one	"The new password must be different from your current password."	
TC-COMM-PROFILE-132	Change password: weak	Change Password open	1. Enter "password1"	Rejected with the same rules as sign-up.	
TC-COMM-PROFILE-133	Change password: success	Code emailed	1. Enter the 6-digit code 2. Confirm	Password changes. The old password no longer works.	
TC-COMM-PROFILE-134	Change email: verify ownership by password	Change Email open	1. Choose verify with password 2. Enter a wrong password	"Your current password is incorrect."	
TC-COMM-PROFILE-135	Change email: same address	Ownership verified	1. Enter the current email as the new one	"Enter a different email from your current address."	
TC-COMM-PROFILE-136	Change email: address in use	Ownership verified	1. Enter another account's email	"This email is already in use. Choose another address."	
TC-COMM-PROFILE-137	Change email: success	Ownership verified	1. Enter a new email 2. Enter the code sent to it	"Email updated successfully." Other devices are signed out. Sign in now uses the new email.	
TC-COMM-PROFILE-138	Change email: limit	3 email changes in the last 24 hours	1. Start another change	"You have reached the email change limit. Try again after the 24-hour cooldown."	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-PROFILE-139	Change email in two sessions	Change started on web	1. Start a change on mobile	"An email change is already in progress in another session. Finish it there or wait for it to expire."	
TC-COMM-PROFILE-140	Notification bell	Unread notices exist	1. Open the bell 2. Mark all as read	Unread count shows on the bell and drops to zero.	

M. Discount Application

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-DISCOUNT-141	Apply for a discount	Approved Regular commuter	1. Open /discount-application 2. Choose Student, Senior Citizen or PWD 3. Upload proof (JPG, PNG, WebP or PDF, up to 5 MB) 4. Submit	Application is Pending. Fare stays Regular until approved. Admins are notified.	
TC-COMM-DISCOUNT-142	Apply while not Regular	Commuter is already Student	1. Open the page and submit	"Discount applications are available only to active Regular commuters."	
TC-COMM-DISCOUNT-143	Apply twice	One application Pending	1. Submit another	"You already have an active discount request."	
TC-COMM-DISCOUNT-144	Cancel a pending application	Application Pending	1. Cancel	Application is cancelled.	
TC-COMM-DISCOUNT-145	Cancel after review	Application reviewed	1. Try to cancel	"This application has already been reviewed and can no longer be cancelled."	
TC-COMM-DISCOUNT-146	Resubmit after correction request	Admin asked for corrections	1. Upload a corrected document 2. Submit	Application returns to Pending for review.	
TC-COMM-DISCOUNT-147	Change category during a correction	Correction requested on a Student application	1. Choose PWD and resubmit	"The discount category cannot change during a correction."	

N. Student Renewal

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COMM-RENEWAL-148	Non-student opens Student Renewal	Regular commuter who was never a student	1. Open /student-renewal	"Student renewal is available only to approved student accounts and former students whose discount expired."	
TC-COMM-RENEWAL-149	Submit enrollment proof	Renewal window open	1. Upload a current school ID or enrollment proof 2. Submit	Renewal is Pending. Admins get "Student renewal submitted".	
TC-COMM-RENEWAL-150	Submit twice in one cycle	Renewal already submitted	1. Submit again	"Renewal is not open or this cycle already has an active application."	
TC-COMM-RENEWAL-151	Switch to Regular	Student commuter	1. Choose No Longer a Student 2. Confirm	Commuter type becomes Regular. Fares are no longer discounted.	
TC-COMM-RENEWAL-152	Snooze or dismiss the reminder	Renewal reminder showing	1. Snooze 2. Dismiss	The reminder hides as chosen.	

Part 3: Conductor App

Roles: Conductor

A. Unit Verification and Starting a Shift

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-SHIFT-153	Start a shift	Admin assigned an Operating unit and an Active driver to this conductor today	1. Open Unit Verification 2. Tap the unit 3. Tap the driver 4. Confirm Shift Setup	Shift starts and the dashboard opens. Admins get "Shift started: unit [no.]".	
TC-COND-SHIFT-154	Unusable units and drivers are greyed out	Some units are on a shift, assigned to others or under maintenance	1. Open Unit Verification 2. Tap a greyed unit	Greyed items show their reason. Tapping one shows "This option can't be used for a shift right now."	
TC-COND-SHIFT-155	Unit already on a shift	Another conductor runs the unit	1. Try to start on it	"Vehicle already on active shift" in the confirm dialog.	
TC-COND-SHIFT-156	Driver already on a shift	Driver is on another shift	1. Try to start with that driver	"Driver already on active shift"	
TC-COND-SHIFT-157	Conductor already on a shift	Conductor has an active shift	1. Open /unit-verification	Taken to the dashboard. A direct start request returns "Already on active shift".	
TC-COND-SHIFT-158	Unit assigned to another conductor or driver	Admin assigned the unit to someone else	1. Try to start with it	"Vehicle is assigned to another conductor." or "Vehicle is assigned to another driver."	
TC-COND-SHIFT-159	Unit under maintenance	Admin set the unit to Under Maintenance	1. Try to start on it	"The assigned vehicle and driver must both be active."	
TC-COND-SHIFT-160	Nothing available	No units or drivers usable	1. Open Unit Verification	"No units available" / "No drivers available".	

B. Operating Device

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-DEVICE-161	Sign in on a second device	Shift running on the mobile app	1. Sign in on a web browser	The shift moves to the device that signed in last. The mobile app shows "View-only on this device".	
TC-COND-DEVICE-162	Collect a fare on a view-only device	Device is view-only	1. Try to record a fare	"This shift is active on another device. Sync and release that device before collecting a fare here."	
TC-COND-DEVICE-163	Release and claim	Device A operates the shift	1. On A, tap Release for handoff 2. On B, claim the shift	Release for handoff only shows on the operating device. After release, B can claim and becomes "This is the operating device".	
TC-COND-DEVICE-164	Claim while the other device still owns the shift	A has not released	1. Claim on B	"Another device still owns this shift. Release it there before claiming this device."	
TC-COND-DEVICE-165	Release with unsynced cash	A has offline cash not yet synced	1. Tap Release for handoff	"Offline cash is still waiting to sync. Keep this device connected and try again."	
TC-COND-DEVICE-166	Device recovered by an admin	Admin recovered the lost device	1. Try to claim from the recovered device	"Use a different device to claim this shift. The recovered device cannot reclaim it."	

C. Live Location, Capacity and Break

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-STATUS-167	Location broadcasting	Shift active, location allowed	1. Keep the dashboard open	The unit moves on the conductor map, the commuter map and admin Monitoring.	
TC-COND-STATUS-168	Set capacity	Shift active	1. Set Standing 2. Set Full 3. Set Available	Status saves each time and shows on the dashboard.	
TC-COND-STATUS-169	Go on break	Shift active	1. Take a Break 2. Confirm	Confirm text: "Your unit pauses from the live map while on break, and won't be flagged as inactive." The dashboard shows On break.	
TC-COND-STATUS-170	End the break	On break	1. End the break	The unit returns to the live map.	
TC-COND-STATUS-171	Overspeeding	Speed limit 40 km/h	1. Drive above 40 km/h	The episode is logged once (not on every GPS ping) in admin Overspeeding history.	

D. Hail Requests

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-HAIL-172	See a hail	A commuter hailed this unit	1. Look at the dashboard map	The waiting commuter shows on the map.	
TC-COND-HAIL-173	Accept a hail	Hail pending	1. Accept	Hail becomes Accepted.	
TC-COND-HAIL-174	Reject a hail	Hail pending	1. Reject	Hail becomes Rejected and leaves the map.	
TC-COND-HAIL-175	Respond to an expired hail	Hail older than 3 minutes	1. Accept it	"Hail has expired"	
TC-COND-HAIL-176	Respond to a hail already handled	Commuter cancelled it	1. Accept it	"Hail is no longer pending"	

E. Recording Fares

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-FARE-177	No stops selected	Collect Payment open	1. Try to continue without stops	"Select both pickup and drop-off to calculate fare". Generate QR stays disabled.	
TC-COND-FARE-178	Cash fare, one passenger	Collect Payment open	1. Pick pickup and drop-off 2. Choose Commuter Type 3. Pay with Cash	"Cash payment has been recorded". A receipt shows the reference number and a claim QR.	
TC-COND-FARE-179	Discounted cash fare	Collect Payment open	1. Choose Student 2. Pay with Cash	The discounted fare is charged (regular less the discount rate).	
TC-COND-FARE-180	Multiple passengers	Collect Payment open	1. Choose Multiple 2. Add passengers by tile 3. Review 4. Pay	One transaction with each passenger's fare. 1 to 50 passengers allowed: "Total passengers must be between 1 and 50."	
TC-COND-FARE-181	GCash fare	Online	1. Choose GCash 2. Generate QR	"Waiting for commuter scan". After the commuter pays: "Fare has been charged via GCash".	
TC-COND-FARE-182	GCash QR expires	QR generated, not scanned	1. Wait 2 minutes	"This QR code has expired. If the commuter already paid on PayMongo, the late webhook may still settle the transaction — check your transaction history in a minute."	
TC-COND-FARE-183	Cancel a GCash payment	QR waiting	1. Cancel Payment	Payment is cancelled and the QR stops working.	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-FARE-184	Double-tap Generate QR	Online	1. Tap Generate QR twice quickly	Only one payment is created and reused.	
TC-COND-FARE-185	GCash group payment	Online	1. Choose Multiple 2. Enter companions only 3. Generate QR	"Payer is added when they scan the QR". One QR covers the group.	
TC-COND-FARE-186	Voucher covers the fare	Commuter shows a free-ride voucher code	1. Apply Voucher 2. Enter the code	"Voucher covered this ride in full."	
TC-COND-FARE-187	Discount voucher	Commuter shows a discount voucher code	1. Apply Voucher 2. Enter the code	"Voucher applied. Collect the remaining fare in cash."	
TC-COND-FARE-188	Voucher code blank or wrong	Apply Voucher open	1. Submit blank 2. Enter an unknown code	"Please enter the voucher code." / "Voucher code not found."	
TC-COND-FARE-189	Voucher already used or expired	Used voucher; expired voucher	1. Enter each code	"This voucher has already been redeemed." / "This voucher has expired."	
TC-COND-FARE-190	Fare after the shift ended	Shift ended on the server	1. Try to record a fare	"The shift has already ended; no new transaction can be recorded."	
TC-COND-FARE-191	Fare calculator	Shift active	1. Open the fare calculator 2. Pick two stops	Shows the fare basis, barangays traveled and the fare for each commuter type.	

F. Offline Use

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-OFFLINE-192	Record cash while offline	Internet off	1. Record a cash fare 2. Reconnect	The connection banner shows offline. The fare is saved and syncs when back online, once.	
TC-COND-OFFLINE-193	GCash while offline	Internet off	1. Choose GCash	"GCash is unavailable while offline. Use cash and it will sync when you reconnect."	
TC-COND-OFFLINE-194	Voucher while offline	Internet off	1. Apply Voucher	"Voucher validation requires an internet connection. Use cash while offline."	

G. Receipts and Transaction History

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-HISTORY-195	Auto-print	Admin turned on Auto-print after each transaction	1. Record a cash fare	The receipt prints without a tap, using the admin's header and footer.	
TC-COND-HISTORY-196	Transaction history filters	Several fares this shift	1. Open history 2. Filter by Cash, GCash, Voucher and by date	Only matching transactions show.	

H. Emergency SOS

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-SOS-197	Send SOS	Shift active	1. Open SOS 2. Slide to send	Alert sent. The admin-set emergency hotline shows as a tap-to-call number. No distance limit applies to conductors.	
TC-COND-SOS-198	Stop SOS	SOS active	1. Stop it	Alert closes. Admins get "SOS stopped".	

I. End of Day and Remittance

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-REMIT-199	Open End of Day	Shift active with fares	1. Open End of Day	"End of Day Report" with the Collection Summary: cash, GCash and total collections.	
TC-COND-REMIT-200	Submit remittance	Shift active, all cash synced	1. Submit remittance 2. Confirm	Shift ends. With cash collected, the remittance shows "For Cash Declaration" until an admin counts it; with no cash, it is complete. The unit and driver become free.	
TC-COND-REMIT-201	Submit with unsynced cash	Offline cash not synced	1. Submit remittance	"Some cash transactions are still waiting to sync. Reconnect to the internet and try again before submitting remittance."	
TC-COND-REMIT-202	Submit twice	Shift already ended	1. Submit again	"Shift has already ended."	
TC-COND-REMIT-203	Official report and history	Past shifts exist	1. Open the official report 2. Open remittance history	Each past shift shows its totals and remittance status.	
TC-COND-REMIT-204	Remittance reminders	Remittance pending past the grace period (30 min default)	1. Keep the app open	A reminder popup: "Shift [id] still has PHP [amount] in expected cash awaiting remittance." It repeats at the set interval until the cash is declared.	
TC-COND-REMIT-205	Shift auto-ends	Shift longer than Maximum shift duration, or still open at midnight	1. Wait for the scheduled check (every 10 minutes)	The shift ends automatically. Remittance shows as pending. The next fare attempt is refused.	

J. Metrics, Settings and Fare Updates

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-COND-OTHER-206	Metrics	Past shifts and feedback exist	1. Open Metrics	Shows earnings, trips and commuter ratings.	
TC-COND-OTHER-207	Profile photo	Settings open	1. Upload a photo (JPG, PNG, WebP up to 3 MB)	Photo updates.	
TC-COND-OTHER-208	Scan sound and clear cache	Settings open	1. Toggle Scan Sound 2. Clear cache 3. Confirm	Setting saves. Cache clears without ending the shift.	
TC-COND-OTHER-209	Signed out after a fare change	Shift active	1. Admin changes the minimum fare or discount rate	A notice counts down about 20 seconds, then the conductor is signed out. After signing in, the same shift reloads with the new fares.	

Part 4: Admin App

Roles: Admin

A. Dashboard and Analytics

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-DASH-210	Dashboard cards	Some activity today	1. Open /admin-dashboard	Shows Total Rides (Today), Total Revenue (Today), Pending Remittance and Active Vehicles.	
TC-ADMIN-DASH-211	Analytics date range	Past data exists	1. Pick a date range	Ridership, revenue (cash, GCash, voucher rides) and shift remittance for the range.	
TC-ADMIN-DASH-212	End date before start date	Analytics open	1. Set the end date before the start date	Refused. No data loads for the invalid range.	

B. User Management: Registrations

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-REG-213	Pending tab	Pending sign-ups exist	1. Open Users > Pending	Each applicant shows details and the uploaded ID (full-size view).	
TC-ADMIN-REG-214	Approve a registration	Pending applicant	1. Approve	Applicant moves to Active with the type they applied for. An approval email is sent.	
TC-ADMIN-REG-215	Reject without a reason	Pending applicant	1. Reject with a blank or 2-character reason	Validation error: at least 3 characters.	
TC-ADMIN-REG-216	Reject a registration	Pending applicant	1. Reject with a reason	Applicant moves to Rejected (with the reason and who rejected it). A rejection email is sent.	
TC-ADMIN-REG-217	Process an already processed registration	Applicant approved in another tab	1. Approve or reject it again	"This registration has already been processed (status: APPROVED)."	
TC-ADMIN-REG-218	Add a commuter at a terminal	Users open	1. Add registration 2. Fill details and upload the ID 3. Save	Account is created with a default password. The commuter must set a new password at first sign-in.	

C. User Management: Accounts

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-USERS-219	Edit a commuter	Active commuter	1. Change contact number and birthdate 2. Save	Saved. Same format and uniqueness rules as sign-up.	
TC-ADMIN-USERS-220	Suspend with a short reason	Suspend form open	1. Enter "bad" as the reason 2. Confirm	Validation error: at least 5 characters. Not suspended.	
TC-ADMIN-USERS-221	Suspend for a set period	Active commuter	1. Pick a reason code 2. Enter a reason 3. Pick 7 days 4. Confirm	Suspended for 7 days (choices: 1, 3, 7, 14, 30, 90 days or permanent). The user's sessions end.	
TC-ADMIN-USERS-222	Suspend own account	Signed in as Admin	1. Open own account 2. Suspend	"You cannot suspend your own account."	
TC-ADMIN-USERS-223	Suspend a conductor	Conductor account	1. Suspend it	"Conductors cannot be suspended. Use Disable Account instead."	
TC-ADMIN-USERS-224	Unsuspend	Suspended commuter	1. Unsuspend	Account is active again and can sign in.	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-USERS-225	Delete own account	Two admins exist	1. Delete own account	"You cannot delete your own account."	
TC-ADMIN-USERS-226	Delete the last admin	Only one admin exists	1. Delete it	"Cannot delete the last administrator account."	
TC-ADMIN-USERS-227	Register a new admin	Users open	1. Register Admin 2. Fill name, email, contact, address 3. Register	Admin is created with a default password and must set a new one at first sign-in.	
TC-ADMIN-USERS-228	Register an admin with a used email	Email already exists	1. Register with it	"The email address is already in use."	
TC-ADMIN-USERS-229	User history	User with activity	1. Open the user's history	Shows the user's activity and past suspensions.	

D. Discount Applications and Renewals

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-DISC-230	Approve an application	Pending Student application	1. Open it 2. Approve	Commuter type becomes Student. The commuter is notified.	
TC-ADMIN-DISC-231	Request correction without a reason	Pending application	1. Choose Request correction, leave reason blank	Validation error: a reason is required for correction and rejection.	
TC-ADMIN-DISC-232	Reject with a reason	Pending application	1. Reject with a reason	Commuter stays Regular and is notified with the reason.	
TC-ADMIN-DISC-233	Review a changed document	Commuter resubmitted while the review was open	1. Approve the stale view	"The supporting document has changed. Reopen the application before reviewing it."	
TC-ADMIN-DISC-234	Review twice	Already reviewed	1. Review again	"This application has already been processed."	
TC-ADMIN-DISC-235	Filters	Mixed applications	1. Filter by status, type (Application or Renewal) and category	Only matching items show.	

E. Fleet: Vehicles

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-VEHICLE-236	Add a vehicle	Fleet Management open	1. Add Vehicle 2. Enter plate, brand, model 3. Save	Created with the next unit number (generated automatically).	
TC-ADMIN-VEHICLE-237	Duplicate plate	Plate exists	1. Add a vehicle with that plate	"The plate number has already been taken."	
TC-ADMIN-VEHICLE-238	Assign crew for the day	Vehicle, driver and conductor exist	1. Edit the vehicle 2. Set route, driver and conductor 3. Save	Assignment is approved for today.	
TC-ADMIN-VEHICLE-239	Change crew during a shift	Vehicle on an active shift	1. Change its driver or conductor	"End the active shift before changing its approved crew assignment."	
TC-ADMIN-VEHICLE-240	Change vehicle status	Operating vehicle	1. Set Under Maintenance	Saved. Admins get "Vehicle status changed: unit [no.]".	
TC-ADMIN-VEHICLE-241	Delete a vehicle	Vehicle not on a shift	1. Delete 2. Confirm	Deleted. Activity Logs shows the deletion.	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-VEHICLE-242	Delete a vehicle on a shift	Vehicle on an active shift	1. Delete	Blocked with a conflict error. The vehicle stays.	
TC-ADMIN-VEHICLE-243	Daily reset	Assignments made yesterday	1. Check after midnight	Yesterday's crew assignments are cleared. Active shifts from the previous day are closed.	

F. Fleet: Drivers and Conductors

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-PERSONNEL-244	Add a driver	Fleet > Personnel	1. Add New Driver 2. Enter license A12-34-567890, contact, address, emergency contact 3. Save	Driver created.	
TC-ADMIN-PERSONNEL-245	Bad license format or duplicate	Add driver form	1. Enter A1234 2. Enter an existing license	Validation error on the license (format A00-00-000000, must be unique).	
TC-ADMIN-PERSONNEL-246	License images	Driver exists	1. Upload front and back (JPG, PNG, WebP up to 5 MB) 2. Save with no image	Images saved. With none: "Upload a front or back license image."	
TC-ADMIN-PERSONNEL-247	Create a conductor account	Fleet > Personnel	1. Create Conductor Account 2. Fill details 3. Save	A generated username and password are shown once to hand to the conductor.	
TC-ADMIN-PERSONNEL-248	Disable a conductor: wrong admin password	Conductor exists	1. View details 2. Disable 3. Enter a wrong admin password	"The password you entered is incorrect."	
TC-ADMIN-PERSONNEL-249	Disable a conductor	Conductor not on a shift	1. Disable with the correct password	Conductor is signed out and shows as Deactivated.	
TC-ADMIN-PERSONNEL-250	Disable a conductor on a shift	Conductor on an active shift	1. Disable	Blocked with a conflict: the shift must end first.	
TC-ADMIN-PERSONNEL-251	Reset conductor credentials	Conductor exists (disabled or not)	1. Reset Credentials 2. Enter admin password 3. Confirm	New username and password are shown. The old password fails, the new one works. A disabled conductor is re-enabled.	
TC-ADMIN-PERSONNEL-252	Remove personnel	Driver not on a shift	1. Remove as Terminated or Resigned	Moved to the Terminated or Resigned list. A person on a shift cannot be removed.	
TC-ADMIN-PERSONNEL-253	Shift logs and ratings	Personnel with shifts	1. Open Shift History 2. Open Ratings & Feedback	Past shifts and commuter ratings for that person.	
TC-ADMIN-PERSONNEL-254	Recover a lost device	Conductor's phone lost mid-shift	1. Recover device 2. Enter a reason under 10 characters 3. Enter a valid reason, tick the unsynced-cash warning	Short reason is refused. Valid recovery frees the shift so another device can claim it.	

G. Receipts and Remittance

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-MONEY-255	Search receipts	Transactions exist	1. Open Receipts 2. Search by reference 3. Filter by date, payment and fare type	Matching receipts with cash and GCash settled totals.	
TC-ADMIN-MONEY-256	Export receipts	Receipts listed	1. Export	A file downloads with the filtered rows.	
TC-ADMIN-MONEY-257	Remittance tracker	Shifts with remittances	1. Open Remittance 2. Filter by conductor and driver	Each shift shows expected cash, GCash and status.	
TC-ADMIN-MONEY-258	Declare cash: exact	Remittance pending, expected PHP 500	1. Enter 500 2. Confirm	Status Complete. Admins get "Remitted PHP 500.00: unit [no.]".	
TC-ADMIN-MONEY-259	Declare cash: short or over	Remittance pending, expected PHP 500	1. Enter 450 (or 520)	Status Shortage of PHP 50 (or Overage of PHP 20). Admins get "Short remittance" (or "Over remittance").	
TC-ADMIN-MONEY-260	Declare cash twice	Cash already declared	1. Declare again	"Cash has already been declared for this remittance."	
TC-ADMIN-MONEY-261	Negative amount	Cash declaration open	1. Enter -10	Validation error. Nothing saved.	

H. Live Monitoring and SOS

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-MONITOR-262	Live fleet	Units on shift	1. Open Monitoring	Every on-duty unit on the map, with units on break marked and their break time.	
TC-ADMIN-MONITOR-263	Acknowledge an SOS	Active SOS	1. Acknowledge	Status Acknowledged. Acknowledging again changes nothing.	
TC-ADMIN-MONITOR-264	Resolve an SOS	Active or acknowledged SOS	1. Resolve	Status Resolved. Admins get "SOS resolved: [name]".	
TC-ADMIN-MONITOR-265	Act on a resolved SOS	Resolved SOS	1. Acknowledge it 2. Resolve it	"Cannot acknowledge a resolved alert" / "Alert is already resolved"	
TC-ADMIN-MONITOR-266	SOS history	Past alerts	1. Open SOS History 2. Filter by status and sort	Shows sender, time, location and who resolved it.	
TC-ADMIN-MONITOR-267	Overspeeding history	Overspeed events	1. Open Overspeeding	Unit, top speed, limit and location for each episode.	
TC-ADMIN-MONITOR-268	Demand zones	Commuters active	1. Open demand zones	Areas with waiting commuters show on the map.	

I. Lost and Found (Admin)

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-LOST-269	Log a found item	Lost & Found open	1. Report Lost & Found Item 2. Enter name, description, unit, category 3. Add photos 4. Save	Item is Available and visible to commuters.	
TC-ADMIN-LOST-270	Required fields blank	Report form open	1. Save with name and description blank	Validation errors. Nothing saved.	
TC-ADMIN-LOST-271	Add a 4th photo	Item has 3 photos	1. Add photo	"This item already has the maximum of 3 photos"	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-LOST-272	Edit a closed item	Item Closed	1. Edit it	"Cannot edit a closed item"	
TC-ADMIN-LOST-273	Approve without a pickup schedule	Pending claim	1. Approve with no pickup location, date or time	"Set a pickup location, date and time before approving this claim"	
TC-ADMIN-LOST-274	Pickup date in the past	Pending claim	1. Set yesterday as pickup date 2. Approve	"The pickup date cannot be in the past."	
TC-ADMIN-LOST-275	Approve a claim	Two pending claims on one item	1. Approve one with a pickup schedule	Claim Approved. The other pending claim is rejected automatically with "Another claim was approved".	
TC-ADMIN-LOST-276	Approve a second claim on the same item	One claim already approved	1. Approve another claim	"Claim is already REJECTED" (the other claims were auto-rejected). Updated from old case 280.	
TC-ADMIN-LOST-277	Reject a claim	Pending claim	1. Reject with a reason	Claim Rejected. If no other claim is open, the item becomes Available again.	
TC-ADMIN-LOST-278	Release the item	Approved claim, claimant came	1. Release	Claim and item become Released.	
TC-ADMIN-LOST-279	Release a pending claim	Claim Pending	1. Release it	"Only APPROVED claims can be released (current: PENDING)"	
TC-ADMIN-LOST-280	Close an item	Item Released	1. Close	Item Closed. Closing an item that is not Released: "Only RELEASED items can be closed (current status: ...)"	
TC-ADMIN-LOST-281	Walk-in claim	Item Available	1. Record a claimant without an account 2. Enter name, contact or email, proof (10-500 characters)	Claim recorded. Proof under 10 characters is refused.	
TC-ADMIN-LOST-282	Expiry and reactivation	Item Available for 30 days	1. Wait for the daily job 2. Reactivate the item	The item becomes Expired and leaves the commuter list. Reactivate makes it Available again. Up to 100 items can be reactivated at once.	
TC-ADMIN-LOST-283	Reactivate a non-expired item	Item Available	1. Reactivate	"Only EXPIRED items can be reactivated (current status: AVAILABLE)"	

J. Announcements, Feedback and Activity Logs

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-COMMS-284	Create with fields blank	New Announcement open	1. Leave title and message blank 2. Save	Validation errors. Nothing saved.	
TC-ADMIN-COMMS-285	Create an announcement	New Announcement open	1. Enter title (max 200), message (max 5000), category 2. Save	Saved as Active and shown to commuters.	
TC-ADMIN-COMMS-286	Edit and archive	Active announcement	1. Edit the message 2. Archive	Edit saves. Archived items leave the commuter feed and are deleted 30 days later.	
TC-ADMIN-COMMS-287	Feedback list	Feedback exists	1. Open feedback for a conductor or driver 2. Filter by rating 1-5	Ratings, categories and comments with a summary.	
TC-ADMIN-COMMS-288	Activity logs	Actions were taken	1. Open Activity Logs 2. Filter by category 3. Export	Each action shows who did it and when. Export downloads the filtered list.	

K. Settings

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-ADMIN-SET-289	Fare matrix: add and edit stops	Settings > Fare Matrix	1. Add a fare point (number, code, name) 2. Edit its landmarks	Saved with "The route line on the maps is unchanged."	
TC-ADMIN-SET-290	Fare matrix: reorder	Several stops	1. Reorder the stops 2. Save	Saved. A list missing a stop is refused: "The ordered list must contain every Fare Point for this route exactly once."	
TC-ADMIN-SET-291	Route line	Route editor open	1. Click the map to add points 2. Save the route line	The new line shows on the commuter, conductor and admin maps.	
TC-ADMIN-SET-292	Delete a route still in use	Vehicles or stops use it	1. Delete Route	"Move assigned vehicles and Fare Points before deleting this route."	
TC-ADMIN-SET-293	Financial rules limits	Settings > Financial Rules	1. Enter minimum fare 0 2. Enter discount 120 3. Enter loyalty 0 rides	Each is refused. Limits: minimum fare 1-1000, discount 0-100%, succeeding fare 0-1000, base barangays 0-100, rides for a free ride 1-100.	
TC-ADMIN-SET-294	Financial rules change the fares	Financial Rules open	1. Change the discount rate to 25% 2. Save 3. Record a Student fare as conductor	The Student fare uses 25%. The fare matrix updates too. (The old case 135 failure is fixed: the fare comes from these rules.)	
TC-ADMIN-SET-295	Operations rules limits	Settings > Operations Rules	1. Enter speed limit 5 2. Enter max shift 50 hours 3. Enter reminder interval 2 minutes	Each is refused. Limits: speed 10-120 km/h, max shift 1-48 h, grace 1-1440 min, repeat 5-10080 min.	
TC-ADMIN-SET-296	Generate free-ride vouchers	Enough eligible commuters	1. Voucher Generator 2. Free ride, quantity 5, valid 48 hours 3. Generate	5 codes are created and given to 5 random eligible commuters, who are notified. Batch shows in history.	
TC-ADMIN-SET-297	Generate more vouchers than commuters	Only 3 eligible commuters	1. Generate 10	"Not enough eligible commuters. Available: 3. No vouchers were distributed." (See note 2.)	
TC-ADMIN-SET-298	Voucher validity under 24 hours	Voucher Generator	1. Set valid for 12 hours	Refused. Minimum is 24 hours.	
TC-ADMIN-SET-299	Delete a voucher	Unused voucher	1. Delete	Voucher removed from the history.	
TC-ADMIN-SET-300	Receipt settings	Settings > Receipt	1. Change business name and footer 2. Turn on auto-print 3. Save	Live preview updates. Conductors' receipts use the new text.	
TC-ADMIN-SET-301	Notification templates	Settings > Notifications	1. Edit a template, insert a variable 2. Preview 3. Save 4. Clear the text and save	Preview fills sample data. Saved text is used for the next notice. Clearing restores the default wording.	
TC-ADMIN-SET-302	Maintenance mode	Settings > App Configuration	1. Turn on for Commuter only with a custom message 2. Save	Commuters see the message. Conductors and admins work normally.	
TC-ADMIN-SET-303	FAQ management	Settings > FAQ Management	1. Add a question (max 500 characters) and answer 2. Move it up 3. Delete another	Changes show in the landing page FAQ bubble.	
TC-ADMIN-SET-304	Admin profile and password	Settings > Profile & Security	1. Change photo (up to 3 MB) 2. Change password with the emailed code	Photo and password update. The old password stops working.	

Part 5: Cross-Role Interactions

Roles: Commuter, Conductor, Admin (two or more at once)

Each case starts with an action by one role (Y) and checks what must update for another role (X). Run them with two or three browsers signed in as different roles. Only relationships that exist in the code are listed.

A. Accounts and Access

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-ACCOUNT-305	Commuter signs up -> Admin	Admin signed in	1. Commuter completes sign-up	Admin bell: "New registration: [name]". The applicant appears under Users > Pending. If still pending after 24 hours, admins get a reminder.	
TC-X-ACCOUNT-306	Admin approves -> Commuter	Pending commuter	1. Admin approves 2. Commuter signs in	Commuter gets the approval email and can sign in. Their fare type is the type they applied for (a Student pays the discounted fare on the next GCash scan).	
TC-X-ACCOUNT-307	Admin rejects -> Commuter	Pending commuter	1. Admin rejects with a reason 2. Commuter signs in 3. Commuter signs up again	Rejection email with the reason. Sign-in fails. The same email can register again; after 3 rejections, sign-up is paused for 3 days.	
TC-X-ACCOUNT-308	Admin suspends -> Commuter	Commuter signed in on /dashboard	1. Admin suspends for 3 days 2. Commuter refreshes 3. Commuter signs in	The commuter is signed out and sees the suspension message with the end date and reason. After Unsuspend, sign-in works.	
TC-X-ACCOUNT-309	Admin disables -> Conductor	Conductor signed in, not on a shift	1. Admin disables the conductor 2. Conductor uses the app	The conductor is signed out and cannot sign in. After Reset Credentials, only the new credentials work.	
TC-X-ACCOUNT-310	Admin maintenance -> Commuter and Conductor	Users of both roles signed in	1. Admin turns maintenance on for Conductor only	Conductors get the maintenance message on their next action and at sign-in. Commuters and admins are not affected.	
TC-X-ACCOUNT-311	Admin edits FAQs -> Public	Landing page open	1. Admin adds an FAQ 2. Reload the landing page	The new FAQ appears in the chat bubble.	
TC-X-ACCOUNT-312	Admin toggles Force Valid ID Upload -> Sign-up	Sign-up form open	1. Admin turns the setting on 2. Reload sign-up	Regular applicants now must upload an ID.	

B. Fleet and Shifts

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-SHIFT-313	Admin assigns crew -> Conductor	Conductor on Unit Verification	1. Admin assigns unit and driver to the conductor 2. Conductor refreshes	The assigned unit and driver become selectable. Units assigned to others stay greyed out with the reason.	
TC-X-SHIFT-314	Admin sets Under Maintenance -> Conductor and Admins	Unit assigned, no shift	1. Admin changes status 2. Conductor tries to start	Conductor: "The assigned vehicle and driver must both be active." All admins: "Vehicle status changed: unit [no.]".	
TC-X-SHIFT-315	Conductor starts a shift -> Admin and Commuter	Admin on Monitoring, commuter on /dashboard	1. Conductor starts the shift and allows location	Admins: "Shift started: unit [no.]". The unit appears on admin Monitoring and on the commuter map after its first GPS fix.	
TC-X-SHIFT-316	Conductor goes on break -> Commuter and Admin	Unit visible to a commuter	1. Conductor takes a break	The unit disappears from the commuter map and hails to it are refused ("Vehicle is currently on break"). Admin Monitoring shows it On break with the time.	
TC-X-SHIFT-317	Conductor sets Full -> Commuter	Commuter has the unit panel open	1. Conductor sets Full	Commuter sees "This unit is full and is not accepting passengers."	
TC-X-SHIFT-318	Conductor overspeeds -> Admin	Speed limit 40 km/h	1. Unit drives at 55 km/h	Admins get one notice per episode: "Overspeeding: unit [no.] at 55 km/h". The event shows in Overspeeding history.	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-SHIFT-319	Admin changes the speed limit -> Overspeed detection	Limit 40	1. Admin sets 60 2. Unit drives at 50	No new overspeed episode is logged.	
TC-X-SHIFT-320	Shift auto-ends -> Admin and Conductor	Shift past the maximum duration	1. Wait for the scheduled check	Admins: "Shift auto-ended: unit [no.]" and an Activity Log entry. The conductor's next fare is refused and the unit leaves both maps.	
TC-X-SHIFT-321	Admin recovers a device -> Conductor	Shift on Device A	1. Admin recovers the device 2. Use Device A 3. Claim on Device B	Device A: "An administrator released this device from the shift ..." Device B can claim and operate the same shift.	

C. Hails

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-HAIL-322	Commuter hails -> Conductor	Conductor dashboard open	1. Commuter hails the unit	The commuter appears on the conductor's map as a waiting hail.	
TC-X-HAIL-323	Conductor accepts or rejects -> Commuter	Hail pending	1. Conductor accepts (or rejects)	The commuter's hail status changes to Accepted (or Rejected).	
TC-X-HAIL-324	Commuter cancels -> Conductor	Hail pending	1. Commuter cancels	The hail leaves the conductor's map. Accepting it now: "Hail is no longer pending".	
TC-X-HAIL-325	No response -> Both	Hail pending	1. Wait 3 minutes	The hail expires for both sides.	
TC-X-HAIL-326	Conductor ends shift with open hails -> Commuter	Hail pending or accepted	1. Conductor submits remittance	The commuter's hail becomes Cancelled.	

D. Payments, Receipts and Rewards

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-PAY-327	GCash QR paid -> Conductor, Commuter, Admin	Conductor generated a QR	1. Commuter scans and pays	Conductor: "Fare has been charged via GCash". The fare appears in conductor transaction history, admin Receipts and the commuter's payment history, and counts toward the commuter's reward.	
TC-X-PAY-328	Discounted commuter scans -> Conductor	Conductor charged as Regular PHP 21.50	1. Approved Student commuter scans	The commuter pays PHP 17.20 (their verified type wins over the conductor's selection). The conductor's record shows the same amount.	
TC-X-PAY-329	QR scanned by two commuters -> Second commuter	Commuter A claimed the QR	1. Commuter B scans	B is refused. Only A is charged.	
TC-X-PAY-330	Cash receipt claimed -> Commuter rewards	Conductor printed a cash receipt	1. Commuter scans the receipt	The ride is added to the commuter's history and reward count. The conductor's and admin totals do not change (it was already counted as cash).	
TC-X-PAY-331	Reward earned -> Commuter, then Conductor	Commuter at 9 counted rides	1. Pay a 10th ride 2. Next ride: conductor enters the commuter's voucher code	A 3-day free-ride voucher appears in Rewards. The conductor sees "Voucher covered this ride in full." and the voucher shows as Used for the commuter.	
TC-X-PAY-332	Admin changes the free-ride rule -> Commuter	Rule 10 rides	1. Admin sets 5 2. Commuter pays rides	New rides count toward the new rule. Vouchers already earned stay.	
TC-X-PAY-333	Admin generates vouchers -> Commuter and Conductor	Eligible commuters exist	1. Admin generates 3 free-ride vouchers	Each recipient gets "Free-ride voucher received" and sees it in Rewards > Available. A conductor can redeem the code once. (See note 2.)	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-PAY-334	Admin changes financial rules -> Commuter and Conductor	Conductor on shift, commuter on /fare	1. Admin changes the minimum fare to PHP 18 2. Commuter reloads /fare 3. Conductor waits	The commuter fare guide and the fare matrix show the new prices. Conductors are signed out after a 20-second notice and get the new fares after signing in; the shift continues. A fare already started keeps its price.	
TC-X-PAY-335	Admin edits stops or route -> Commuter and Conductor	Both apps open	1. Admin adds a fare point 2. Reload both	The new stop appears in the commuter fare guide and the conductor fare picker.	
TC-X-PAY-336	Admin changes receipt settings -> Conductor	Conductor on shift	1. Admin changes the footer 2. Conductor records a cash fare	The printed receipt shows the new footer.	

E. Remittance

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-REMIT-337	Conductor submits remittance -> Admin	Shift with PHP 500 cash	1. Conductor submits	Admins: "Shift ended: unit [no.]" (Remittance: PENDING). Remittance tracker shows it pending cash declaration. The unit and driver are free for another shift.	
TC-X-REMIT-338	Admin declares cash -> Conductor and Admins	Remittance pending	1. Admin declares PHP 500	Status Complete. Admins get "Remitted PHP 500.00: unit [no.]". The conductor's pending reminders are marked read and stop.	
TC-X-REMIT-339	Cash not declared in time -> Conductor and Admins	Remittance pending past the grace period	1. Wait	The conductor gets reminders at each interval. Admins get "Overdue remittance: unit [no.]".	

F. Safety

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-SAFETY-340	Commuter SOS -> Admin	Admin signed in	1. Commuter sends SOS near a unit	Admins get an email and a bell notice. The alert appears on Monitoring with the commuter's location.	
TC-X-SAFETY-341	Admin acknowledges -> Commuter	Commuter SOS active	1. Admin acknowledges	The commuter's screen changes from "Waiting for dispatch to respond" to "Dispatch has received your alert".	
TC-X-SAFETY-342	Admin resolves -> Commuter	SOS active	1. Admin resolves	The commuter's alert ends. Other admins get "SOS resolved".	
TC-X-SAFETY-343	Commuter or conductor stops SOS -> Admin	SOS active	1. Sender stops it	Admins get "SOS stopped: [name]". The alert shows Resolved by the sender in history.	
TC-X-SAFETY-344	Conductor SOS -> Admin	Admin signed in	1. Conductor sends SOS	Same alert flow as a commuter SOS, marked as a conductor sender.	
TC-X-SAFETY-345	Commuter shares a ride -> Viewer	Link created	1. Viewer opens the link 2. Commuter stops sharing	The viewer sees the live position. After stopping, the viewer page no longer shows the location.	

G. Lost and Found

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-LOST-346	Admin logs an item -> Commuter	Commuter on Lost & Found	1. Admin saves a new item 2. Commuter reloads	The item appears as Available.	
TC-X-LOST-347	Commuter claims -> Admin and other commuters	Item Available	1. Commuter submits a claim	Admin bell: "New claim: "[item]"". Other commuters see the item as Claimed and can still submit their own claims.	
TC-X-LOST-348	Admin approves -> Claimant, other claimants, watchers	Two claims; a third commuter watches the item	1. Admin approves one claim	Claimant: "Claim approved" with pickup place and time. Other claimant: rejected ("Another claim was approved"). Watcher: "No longer available".	

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-LOST-349	Admin rejects -> Claimant and watchers	One pending claim; a watcher	1. Admin rejects the claim	Claimant: "Claim rejected" with the reason. Watcher: "Available again".	
TC-X-LOST-350	Admin releases -> Claimant	Approved claim	1. Admin releases the item	Claimant: "Returned to you". The claim shows Released in My Claims.	
TC-X-LOST-351	Claimant misses pickup -> Claimant	Approved claim, pickup date passed	1. Wait for the daily job	Claimant: "Pickup missed" and the claim is closed.	
TC-X-LOST-352	Item near expiry -> Watchers	Watched item 3 days from expiry	1. Wait for the daily job	Watchers get "Leaving [date]" for the item.	

H. Discounts, Feedback and Announcements

Test Case ID	Test Case Description	Pre-conditions	Steps	Expected Result	Status
TC-X-OTHER-353	Commuter applies for a discount -> Admin	Admin signed in	1. Commuter submits a Student application	Admin bell: "Student discount application: [name]". If unreviewed after 24 hours, admins get one reminder.	
TC-X-OTHER-354	Admin approves a discount -> Commuter and Conductor	Pending application	1. Admin approves 2. Commuter scans a GCash QR	Commuter notice uses the "discount approved" template. The GCash fare is now discounted.	
TC-X-OTHER-355	Admin requests correction -> Commuter	Pending application	1. Admin requests correction with a reason	Commuter notice with the reason. The form opens for resubmission; the account stays Regular.	
TC-X-OTHER-356	Student renewal deadline passes -> Commuter	Student did not renew	1. Wait for the midnight job after the deadline	Commuter type becomes Regular and they get "Student discount expired". The next GCash fare is regular.	
TC-X-OTHER-357	Commuter rates a ride -> Conductor and Admin	Feedback submitted	1. Conductor opens Metrics 2. Admin opens the conductor's Ratings & Feedback	The new rating shows in both places.	
TC-X-OTHER-358	Admin posts an announcement -> Commuter	Commuter signed in	1. Admin creates an announcement	The commuter's bell unread count goes up and the announcement shows in the feed.	
TC-X-OTHER-359	Admin archives an announcement -> Commuter	Announcement visible	1. Admin archives it	It disappears from the commuter feed.	
TC-X-OTHER-360	Admin posts an announcement -> Conductor	Conductor signed in	1. Admin creates an announcement	Nothing shows in the conductor app: it has no announcement feed, only the remittance reminder popup. (See note 3.)	
TC-X-OTHER-361	Admin edits a notification template -> Recipient	Template edited	1. Trigger that notice (e.g. approve a discount)	The recipient sees the edited wording.	
TC-X-OTHER-362	Admin actions -> Activity Logs	Any admin action	1. Edit a vehicle 2. Open Activity Logs	An entry names the admin, the action and the changed fields.	

Notes

1. Changes from the 09_27_2026 test cases. Old case 041 expected /login when a commuter opens an admin page; the app now sends a signed-in user to their own dashboard. Old cases 125 and 126 (route detours and route versions) were removed because the route is now one line with no versions or detours. Old case 135 (discount rate) is now expected to pass: every fare is priced from Financial Rules. Old case 139: the hotline shows on the SOS screens; the sender Gmail and SOS templates were removed from Settings, which is now a Notifications template editor. Old cases 156 to 160: the latest sign-in takes over the shift and the other device becomes view-only; Release for handoff shows only on the operating device. Old case 149 was dropped because Unit Verification has no Continue button. Old case 280 now expects "Claim is already REJECTED" because other claims are rejected when one is approved.

2. Possible defect found during review (voucher distribution). The Voucher Generator only picks commuters whose account status is ACTIVE. Approving a registration sets the status to APPROVED, and only unsuspending a user sets ACTIVE. So a commuter approved through the normal sign-up flow may never receive generated vouchers, while the rest of the system treats APPROVED and ACTIVE the same. Expect TC-ADMIN-SET-296, TC-ADMIN-SET-297 and TC-X-PAY-333 to fail or show a low "Available" count until this is confirmed.

3. Conductors and announcements. Admin announcements are stored for every role, but the conductor app shows no announcement feed. If conductors should see them, that is a new feature (TC-X-OTHER-362), not a bug.

4. Timing values. Hails expire after 3 minutes, GCash QRs after 2 minutes, cash receipts can be claimed for 6 hours, share links last 30 minutes, reward vouchers last 3 days, found items expire after 30 days, archived announcements are deleted after 30 days, and sign-up and reset codes last 15 minutes. These come from config and may be changed on the server.

5. Where scheduled jobs run. Hail and payment expiry run every minute, shift auto-end every 10 minutes and at midnight, remittance reminders every 5 minutes, registration and discount reminders hourly, student renewals and daily assignment resets at midnight, Lost & Found expiry at 1:00 AM and announcement pruning at 2:00 AM (Philippine time). Cases that depend on these need the scheduler running.
