Appendix D: Client Evaluation Form

System Evaluation Form for CaterXperience (Based on ISO/IEC 25010 Standards)

Instruction: Please check (✓) the column that best represents your answer.

Criteria	**5 - Strongly Agree**	**4 - Agree**	**3 - Neutral**	**2 - Disagree**	**1 - Strongly Disagree**
A. Functional Suitability					
A1. The system provides all the functions needed for catering operations (booking, payments, inventory, 2D layout).					
A2. The system produces correct and reliable results (e.g., accurate bookings, payment calculations, layout diagrams).					
A3. The system provides features that are appropriate for event planning and staff coordination.					
B. Reliability					
B1. The system runs without errors during use.					
B2. The system is available when I need it.					
B3. The system continues to work even if there are minor issues.					

B4. The system can recover important records after a crash or failure.					
C. Performance Efficiency					
C1. The system responds quickly to my actions.					
C2. The system uses device and server resources efficiently.					
C3. The system can handle many users or large event data without slowing down.					
D. Usability					
D1. The system is easy to learn and use.					
D2. The interface is user-friendly for managers, staff, and clients.					
D3. The system helps prevent or alert user mistakes (e.g., double bookings, overdue payments).					
D4. I am satisfied with the overall design and experience of the system.					
D5. The system's design is both visually appealing and clearly tailored for catering operations.					

D6. The system can be used easily by people with different needs and abilities.					
D7. It is easy to interact with the system to get tasks done.					
E. Compatibility					
E1. The system works well on common devices and browsers.					
E2. The system can work with external devices (e.g., printers).					
F. Security					
F1. The system protects sensitive data (bookings, payments, client info).					
F2. The system keeps records of user activities for accountability.					
F3. The system ensures only authorized users can access functions.					
F4. The system keeps data accurate and prevents unauthorized changes.					
F5. The system ensures that user actions (like bookings or payments) can be traced and are non-repudiable. (i.e. the user cannot deny having performed them.)					

G. Maintainability					
G1. The system modules (booking, payments, layout) can be updated independently.					
G2. Parts of the system can be reused for future features.					
G3. The system allows issues and impacts of changes to be understood clearly.					
G4. The system can be updated (e.g., add menus or edit venue layouts) without affecting other functions.					
G5. The system's functions can be tested effectively.					
H. Portability					
H1. The system works on different devices (laptop, tablet, smartphone).					
H2. The system can be installed easily in various environments.					
H3. The system can replace manual workflows without disruption.					

Open-Ended Questions

What is the most significant improvement we could make to the system?

_____

Please suggest any additional features that would be valuable for your catering operations.

_____

Acknowledgement

I hereby confirm that my responses are based on my actual experience using the system. I understand that the results will be used solely for academic purposes as part of the capstone project “CaterXperience: A Catering Operations and 2D Venue Layout Planning Platform for Ollinati Catering.”
